

Representatives Named For District Arena

All Ideas To Be Aired At Meeting Of Board of Trade on April 18

Mr. A. C. Archibald, President of the Irma and District Board of Trade announced today that the machinery is in operation to gather opinions and suggestions in regard to a circular letter mailed last week concerning an Irma and District Arena.

The contact personnel are divided into school districts and are as follows: Albert District, John Barss; Orbindale, Gar Coulman; Roseberry, Chas. Younker; Crescent Hill, Martin Enger; Sunny Brae, Mrs. C. E. Fenton; Strawberry Plains, Norris Tomlinson; Glenholm, Jim Jackson; Coal Springs and Jarow, Merle Knudson; Batts and Jarow, Geo. Bridgeman; Ross, Ralph Congdon; Education Point and Alma Mater, A. C. Archibald; Irma School District, Albert Glasgow; Irma Town, J. A. Hedley.

These representatives are to contact as many people in their respective districts as possible to determine whether or not they agree to the suggestions for financing our project, and also to gather any suggestions regarding an Arena either in respect to financing, location, type of construction, when construction should start or any other pertinent suggestions on this undertaking.

All of these ideas are to be aired at the next regular meeting of the Irma and District Board of Trade to be held on Tuesday, April 18, at 8:30 p.m. in Hedley's Hall.

Let's put this arena project over right now by our enthusiasm and whole-hearted community spirit. We all agree that we need an arena—well—LET'S BUILD ONE!

FUA Seeks Cheaper Warble Time Again Auto Insurance Rates

An amendment designed to reduce the cost of premiums on Automobile Accident Insurance in Alberta is being sought by the FUA, farmer officials announced today. The FUA executive points out that premiums covering comparable provisions in Alberta are far higher than those in effect in Saskatchewan, and that the Alberta Automobile Accident Indemnity Act under its present set-up, however good in intent, has the effect of playing into the hands of lawyers and insurance companies at excessive expense to car and truck owners.

In a petition form sent out to the FUA locals the executive points out that the farm organization is interested in securing for the motorists of Alberta a simple and relatively cheap plan under which they will be protected against lawsuits arising out of automobile accidents, and which will compensate all persons involved in such accidents irrespective of fault or blame.

Among the objectionable features of the Alberta Act are such as the taking away of drivers' licenses irrespective of whether the driver was at fault or not. The provision for impounding cars and the necessity of going to court and getting judgement before a claim can be made on the fund, and other objectionable features that are reflected in the fact that so little money has been paid out under it in comparison with the amount taken in.

The FUA points out for example that premiums on approximately similar policies in Saskatchewan and Alberta cost \$11 and \$35 respectively and other premiums are proportionately out of line.

The FUA is seeking amendments by asking their locals to petition their respective M.L.A.s requesting the following:

1. That standard coverage of public liability and property damage insurance be automatically provided at cost and issued with each car and truck license.

2. That fire and theft insurance and any additional coverage be provided on an optional basis through the Provincial Insurance Office.

The small amount of time and material required for warble fly treatment of cattle is the cheapest outlay stockmen can make for the returns obtained. It costs no more than 3c to 5c per head for treatment. This is repaid many times by gains in beef and milk yield, prevention of damage to hides, and the freedom of the cattle from warble discomfort.

W. Lobay, Supervisor of Crop Protection, says that fewer cattle were treated last year than during the past years. There may be good reason for this. As a result of the effectiveness of earlier campaigns, many herds are at present free from warbles. Although it is encouraging to observe these results, Mr. Lobay warns that because some herds are warble-free is no reason for discontinuance of control in the area. Community control should be carried on in every district in Alberta in an endeavour to rid the province of this pest.

The treatment is simple and inexpensive. Warble fly powder containing rotenone or derris can be obtained at the nearest local farm supply or drug store. For treatment of a few head of cattle, no machine is required. Simply fix the warble fly wash according to directions and treat by rubbing in the solution with a stiff brush. For larger herds, a spraying unit is effective and economical. With the machine, a pressure of at least 300 pounds per square inch is required. This will open the soft protective layer covering the openings in the skin, so that the solution can penetrate to kill the grubs.

A number of Service Boards in Alberta are conducting organized warble fly campaigns with success. Community control is the best way to ensure warble-free areas. The Alberta Department of Agriculture will gladly aid any community desiring to organize a warble fly campaign, and full information can be obtained from the Supervisor of Pest Control, Alberta Department of Agriculture, Edmonton.

Ladies — Please bring lunch (cake or cookies preferable) for the official opening of the new Irma School on April 3.

Program Lined Up For New School Opening April 3

Dr. W. H. Swift, deputy minister of education for the province of Alberta will be the principal speaker at the official opening of the new Irma school which is slated to take place on Monday afternoon, April 3.

An interesting program has been lined up for this auspicious occasion, and a good turnout is expected.

Following is the program:

Program
Chairman's Remarks, F. Hill; Invocation, Rev. H. Inglis; Vocal Solo, Doreen Simmermon; Greetings from the Mayor of Irma, C. P. Jones; Representative of the Irma Local School Board, C. Smallwood; Piano Solo, Elvina Soneff; Duet, Shirley Fyfe and Rita Fenton; Remarks, Mr. F. S. Reeds, Principal of Irma School; Jack Simmons, President of Irma Students Union; Mr. Wm. Masson, M.L.A.; Mrs. J. Larson, Representative of the Home and School Ass'n.; Mr. D. Gunn, A.T.A.; Mr. P. Campbell Hope, Architect; Mr. O. Griffiths, Secretary Wainwright S.D.; Mr. S. D. Simpson, Supt. Wainwright S.D.; Mr. A. G. Andrews, Secretary of the A.S.T.A.; Address, Dr. W. H. Swift, deputy minister of Education; Conducted tour through the new school.

Stampede Injuries Bring \$4,650 Action

Claiming he was "run down" by race horses at a stampede at Holden last June 15, Robert Magee, of Edmonton, filed a statement of claim against the Benevolent and Protective Order of Elks of Alberta for \$4,650 damages at the Court House Wednesday.

Mr. Magee states he attended the stampede, promoted by the Elks, as their guest. In attempting to cross the race track to the amusement centre, he says, he was injured. He alleges there was no warning a race was in progress, that there was no bar or guard on the gate to which he entered the track, and that the track was not properly fenced.—Edmonton Bulletin.

Kinsella and District News Items

The final wheel drive of the season was held at the school last Wednesday evening. The prize winners were as follows: Ladies Grand Prize, Mrs. M. Gayter; Gents, Mr. M. Bilio; Evening prizes were won by Mrs. F. Jack. G. Ganie, Miss E. Maggs and Mr. E. Overbo.

Miss Elaine Jack celebrated her fifth birthday with a party on Monday, entertaining a number of her young friends.

Visitors to the city last week were Mr. and Mrs. D. Greenwood and Mr. F. Murray.

Mrs. S. Simmons is at present a patient in the Viking hospital. We all wish her a speedy recovery.

Miss Barbara Long of Edmonton has been visiting at the home of her grandparents, Mr. and Mrs. Frank Long.

Mr. R. Cornack attended the funeral of Mr. R. Clark of Ranfurly on Saturday, March 25. Mr. Clark was the son of Mr. Cornack's schoolmaster in Scotland and also his own school friend.

Miss D. Zimmerman of Irma spent the week-end in Kinsella. Miss J. Christensen spent the week-end with her friend, Miss A. Barker.

ANNOUNCE ENGAGEMENT

Mr. and Mrs. G. Coulman wish to announce the engagement of their eldest daughter Kathleen Sheila to Clifford R. Emmott, the youngest son of Mr. and Mrs. R. Emmott of Victoria. The marriage to take place in Edmonton April 15.

Pioneer Irma Lady Passes Away

KATHARIN L. SELLSTEDT Katharin Layva Sellstedt passed away at the Wainwright hospital after a short illness on March 21. Mrs. Sellstedt was born in Ransel, Sweden, on June 28, 1875. She came to Canada in 1909 and has resided on the homestead north of Irma until her passing. Her husband passed away on December 21, 1949.

She leaves to mourn her loss, three sons, Harry of Edmonton, Klein and Bert of Irma and three sisters in Sweden.

Funeral services were held at the United Church at 2 p.m. on March 24 with Rev. H. W. Inglis officiating. She was laid to rest by her husband in the Irma cemetery.

Pall bearers were Carl Larson, Alf Larson, Wm. Stewart, John Dubaz, Charlie Archibald and Ole Halvorsen.

Mrs. Sellstedt's funeral parlor of Wainwright was in charge.

Beautiful floral tributes were received from: Harry, Klein and Bert; Mr. and Mrs. Carl Larson and family; Pon Luong; Mr. and Mrs. J. Pond and family; Mr. and Mrs. P. E. Jones and family; Mr. and Mrs. Frickelton and family; Mr. and Mrs. J. Dubaz and family; Mr. and Mrs. Erling Larson; Mr. and Mrs. Alf Larson; Mr. and Mrs. H. Larson; Mr. and Mrs. R. O. Larson; Mrs. Capt. Larson; Mr. O. Halvorsen.

To the Alberta Protestant Home for Children: Mr. John Watson; Mr. and Mrs. Gordon Ramsay; Mrs. Katie Nash; Mr. and Mrs. R. L. Rohrer; Mr. and Mrs. John Archibald; Mrs. Ida Knudson; Mr. and Mrs. R. Dempsey; Mr. and Mrs. J. Jackson; Mr. and Mrs. A. C. Knudson; Mr. and Mrs. L. Hollinger; Mr. and Mrs. N. Fluevog; Mr. and Mrs. W. J. Reitan; Mr. and Mrs. Harvey Riley.

To the Irma United Church: Mrs. Margaret Steele and Messrs. Frank Crabb and W. Walker motored to Edmonton Tuesday to attend the playoff game between the Calgary Stampede and the Edmonton Flyers.

Easterly Echoes

Remember the Roseberry FUA meeting at the school Wednesday, April 12. Lunch committee, Mrs. Jack Savard and Mrs. Maun.

The next meeting of the Battle River W.I. will be held at the home of Mrs. R. Dempsey. Roll call to be donation of an article of used clothing. Draw, Mrs. Morse. Program, Mrs. Patterson. Hostesses, Mrs. M. Enger and Mrs. R. Dempsey.

Mr. Stuart Fenton made a good showing at the Edmonton Live Stock Show, placing Reserve Champion Hereford Female of the show. He also placed second and third in the two year old female class.

Mr. and Mrs. Allen Taylor motored to Edmonton on Saturday where Mr. Taylor assisted Coulman's orchestra in making some records, also a half hour program that was given over Station CKUA on Wednesday.

Playing 500 at the W. I. party at the home of Mr. and Mrs. Patterson the first prize winners were Mr. and Mrs. A. Cook, with the consolation prizes going to Mr. and Mrs. J. Savard.

CARD OF THANKS

We wish to thank our many friends for kindness and sympathy extended to us during our recent and sad bereavement; also for the beautiful floral tributes and donations and to those friends who visited mother at the hospital and also those who sent her fruit and candy. Special thanks to Mr. and Mrs. Carl Larson.

—Harry, Klein and Bert.

IRMA CO-OP ASSN. LTD. TO HOLD MEETING

An annual meeting of the Irma Co-op will be held in Hedley's Hall at 1:30 p.m. sharp on April 1, 1950. All shareholders are asked to attend.

Irma W.I. To Meet On April 8

The April meeting of the Irma W.I. will be held at Mrs. Hynka's on Thursday, April 6. Hostesses, Miss Jones and Mrs. C. Smallwood. Mrs. Long will have charge of the raffle. Mrs. E. Rae the program. Roll Call, Exchange of Flower Seeds.

M.D. No. 73 Is T.B. Accredited

Hon. D. A. Ure, minister of agriculture, has announced that according to advice received from the veterinary director general at Ottawa, municipal district No. 73 is now a fully accredited T.B. free area. Its status will be effective until Sept. 1, 1954.

Such areas are established under the authority of the veterinary director general before a municipality can become a T.B. restricted area, a petition must be signed by at least two-thirds of the cattle owners in the Municipality. This petition is submitted to the provincial minister of agriculture, who approves it and forwards it to the veterinary director general. When the veterinary director general accepts the petition, the Dominion department of agriculture arranges for testing of cattle within the area.

Since 1939 over a quarter of a million cattle have been tested in this province and testing has been completed in seven municipalities. One other municipality was declared a restricted area last fall, and testing in this area is now under way. "The ultimate objective is to have the whole province a T.B. restricted area," said the minister, "but for the present the intention is to complete a block from Edmonton to Calgary with existing restricted areas as a nucleus. Tests to date have shown Alberta particularly fortunate in the low incidence of tuberculosis in cattle," said Mr. Ure. "Although over one-quarter of a million cattle have been tested, an average of only two reactors per one thousand has occurred." Mr. Ure further stated that petitions also are being circulated in all municipalities as far south as Crossfield and it is hoped to go as far as Calgary in the near future.

—Market Examiner.

Red Cross Issues Warning To Kids Living Near Water

TORONTO, Mar. 23—A special warning was issued today by Dr. Harvey Doney, National Red Cross safety director, to parents of young children living near water, regarding the treacherous of the spring season.

"Now, with the ice going out and ponds and rivers swollen and currents swift, playing on or near the water is particularly dangerous," he warned.

"But currents and ice-pans fascinate children and with the stopping of winter sports and the warmer weather, they are tempted strongly to play around water. Parents should caution their children, the director said, making sure they understand the gravity of water hazards at this season. Very young children should be watched.

"Rafts, logs, small boats are particularly treacherous in swift currents and after they have lain ashore all winter are unseaworthy. At the same time, the water is extra cold and with the heavy clothing still being worn can prevent even good swimmers from reaching shore when a boat or raft tips."

Parents also should see that "reaching assists"—ladders, poles, ropes, planks or buoys—are stationed at river banks, ponds, ditches and other places where water presents a danger, so that rescues can be effected quickly and safely without further risk of drown-5 p.m. Appointments to be made at IRMA DRUGS

MORE PEOPLE TO GET GAS SERVICE

The extensive program of expansion announced by the Northwestern Utilities Limited indicates the growing demand for natural gas service by rural and urban citizens, business firms and power plants that want to change over from coal to gas because it is more convenient and cheaper. It is also an indication of the policy of the company to supply gas to more and more consumers as supplies of pipe and other needed materials increase. The gas company too has maintained a reasonable gas rate structure which is one of the lowest, if not the lowest, on the North American Continent. Since the first line was constructed to Edmonton in 1923, thousands of new customers have been added to the company's list and from the amount being spent on extensions and new services this year, the NW Utilities is endeavoring to keep pace with the demand for gas service now and in the future. It speaks well for the faith the gas company has in the future growth of the part of the province they serve so well. Northern Alberta is on the march!

HEALTHY COWS

Denmark has practically eliminated tuberculosis and its dairy herds are almost completely free of the disease. Swedish herds are 97 per cent free. In the United Kingdom plans have been developed to eliminate bovine tuberculosis completely, but have been temporarily postponed to reduce public expenditure.

When filled with hot water, a thick glass will crack more quickly than a thin one.

Awards to prize winners at Toronto's Royal Winter Fair use more than four miles of ribbon.

AUCTION SALE

FOR H. S. JENSEN

will be held on
WEDNESDAY, APRIL 5
on Sec. 33-47-12-4 3/4 miles East
(on old highway) of
VIKING

Lunch served. Sale starts at 10:30.

The following will be for sale:

Farm Machinery

2 Massey-Harris Tillers; Cock-shutt 4-furrow Plow, like new; McCormick Seeder, 23 run; Double Disc, 10'; 2 Packers; 10 section Drag Harrows; 3 Gas Engines; Int. 7 h.p., Int. 1 1/2 h.p. Fairbanks-Morse 3 h.p.; Wagons; Bob Sledges; Cutters and many other useful items of farm machinery.

3 Tractors
Mc-Deering W.K. 40, on rubber wheels; Minneapolis 25 on rubber wheels, also steel wheels; Rumley 20-40.

Livestock and Poultry
4 milk-cows; 9 calves; Shorthorn Bull; Team of young Horses; 71 New Hampshire Laying Hens.

Harness
2 sets Breaching Harness; Set of Breast Harness; Light Harness; 2 Saddles.

Miscellaneous
32-volt Windcharger; Electric Plant 32 volt, 1500 Watt; Steel Drums, all sizes; 10' Water Tank; Full line of Blacksmith Tools, and numerous other items.

Household Goods
Beds, Chairs, Dressers, Tables, Sewing Machine, Power Washer, 32-volt, Safe, Chesterfield Set, 2 Chairs; Writing desk.
Terms of Sale are Cash. No goods to be removed until settled for.

AUCTIONEERS
G. STALKER and M. ZOWTUK
Lic. Nos. 24 and 188-49-50.
L. J. Rasmussen, Clerk.

Gas Company Plans Construction Program

**\$4,000,000.00 Will Be Spent;
Viking-Kinsella Camps to be Enlarged**

During 1950 Northwestern Utilities Limited is planning the largest capital construction program in its history, totalling \$4,000,000.00. In considering the program for 1950 the general economic conditions in this area were studied. The program was designed with a view to serving some 4,600 new consumers, including the conversion of two additional boilers at the City of Edmonton Power Plant and three or four other possible large consumers. In addition, the plant expansion is being so engineered as to take care of further possible additional growth in the City of Edmonton and the remainder of the areas served by the Company in future years.

The following will give some of the larger items upon which the \$4,000,000.00 will be spent this year.

\$934,500.00 provides for the drilling and connecting up of six new wells in the Viking-Kinsella Field plus connecting to Northwestern's system two wells which have already been drilled by Imperial Oil Limited and have been acquired by Northwestern. In addition there will be approximately eleven miles of 16 inch pipe laid in the Kinsella Field, ten and a half miles of 4 inch and some ten miles of other pipe line of varying sizes, including a line to serve the hamlet of Kinsella.

Some \$82,000.00 has been provided for additional buildings at the Company's main camp at Viking. Staff house and furnishings, \$57,000; New dwellings \$12,000; Additional Shop space \$5,000; Other Improvements \$8,000.00.

\$100,000.00 provides for the reconstruction and redesign of the Viking Field Measuring Station in order to meet the increased consumption anticipated in the winter of 1950-1951.

\$519,000.00 will be spent on the construction of a transmission line to serve the Town of Fort Saskatchewan and other customers en route. From this line branch lines

will be laid to serve the new British American Oil Company's Refinery, the McColl-Frontenac Oil Company's Refinery and the Pumping Station of the Interprovincial Pipe Line Company.

\$448,000.00 will be spent on the construction of an 8 inch transmission line from the Imperial Oil Gasoline Plant at Devon to the City of Edmonton. This will bring natural gas from the Leduc Oil Field into the City and will assist in handling the Gas Company's increased peak demand, particularly that of the City of Edmonton Power Plant. With the remarkable growth of the Gas Company's market in the City of Edmonton and adjacent areas, the assurance of long range supplies becomes of salient importance and indicates the advisability of supplementing even the large reserves now controlled in the Kinsella Field.

Some \$335,000.00 will be spent in constructing a new regulating station and other facilities at the Eastern limits of the City and at the termination of the three transmission lines from the Kinsella Field. This substantial expenditure is also needed to adequately serve the Company's increased business. Also provides for construction of a new regulation station to serve the town of Viking.

Some \$65,000 has been allotted to enlarging the Compressor Station close to the Hamlet of Poa where the Company's transmission line to serve the Cities of Wetaskiwin and Red Deer and the Towns of Camrose, Ponoka and Lacombe starts. This expenditure is necessary to meet the rapidly increasing demands from these communities.

\$643,000.00 will be spent on constructing new intermediate pressure lines within the City of Edmonton to serve newly developed areas and increased demands on our system caused by new construction, particularly in the North West end of the City. This I.P. System will consist of pipe lines of varying sizes, namely 20 inch, 16 inch and 12 inch.

Approximately \$300,000.00 has been allotted for other extensions in the City of Edmonton and the Towns of Camrose, Ponoka and Lacombe to take care of new business and also for the distribution system in the town of Fort Saskatchewan.

\$248,000.00 will provide for new service lines, regulators and meter installations to the 4,600 anticipated new consumers.

\$198,000.00 provides for the purchase of a sufficient number of new meters to serve new customers.

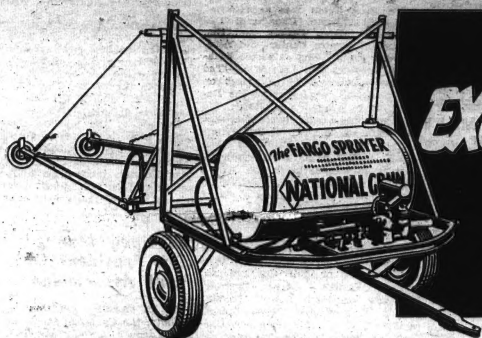

\$49,000.00 will be spent on combined residence and office buildings in the Towns of Camrose and Ponoka and for additions and alterations to Company buildings at other locations including the main office in the City of Edmonton. \$106,000.00 will be spent on additional equipment of all descriptions such as shop and garage equipment, office equipment, motor vehicles and additions to the Company's FM radio communications system.

Viking Items

After serving 29 years as secretary-treasurer of the Viking co-operative creamery association, and 25 years as secretary-treasurer of the Viking Municipal Hospital Board, Mr. Horace Rollans has resigned these positions to go into the real estate business for himself in Edmonton.

Mr. Rollans came here in 1916 as ledgerkeeper in the local branch of the Merchants Bank which later was taken over by the Bank of Montreal. He left the bank service as accountant and returned to Viking in the fall of 1920. He has seen the town and district grow from a rather small beginning to its present status as one of the best in the province. He served one year as member of the village council and has taken an active part in lodge work and other social and civic affairs. He will take charge of his new business in the city as soon as his positions are filled here.

"As Busy as a Beaver" is coming to Viking, Wednesday, April 19 for one night only. Watch for further announcements.

Only the National Fargo Sprayer for 1950 offers so many time-saving, labor-saving, money-saving improvements. It's the ideal sprayer for the application of weed or insect killing chemicals.

EXCLUSIVE!
ONE VALVE CONTROL

The Fargo Control valve contains the line strainer and pressure regulating valve—controls mixing, filling, spraying, and "suck-back", easily operated direct from tractor seat.

EXCLUSIVE!
NEW BOOM PRINCIPLE

An acid-resistant, all-bronze rust-proof, non-corrosive 33-foot tube is fixed to heavy 2-inch steel tubing which acts as a protector and support. This is found only on Fargo Sprayers.

EXCLUSIVE!
JET PROPELLED FILLING

This Fargo feature reduces filling time to approximately 5 minutes, is entirely automatic, has no moving parts to adjust or wear out.

Other NATIONAL Machines
The "Westerner" Tractor Mount is a leader in sprayers of this type, embodies many of the Fargo features. Rigidly built for years of service.
The "Brandt" Duster has ball-bearing, turbine-type blower, non-clogging, easily controlled dust-feed, combining efficiency with economy.

Cheaper Living Formula Sought In Laboratories

(By a Central Press Canadian Correspondent)

Did you ever hear butter make a noise?

Well, it does just that. And, to a man with a good ear, the sound of butter may be a tell-tale indication of whether you should eat the stuff or save it for cooking.

Butter graders, a sensitive crew out to protect consumers against inferior products, use all of their five senses in measuring butter quality. If a test plug of butter lacks body, it makes a sloshing sound, ultimate evidence that it is of low grade.

Most important butter tests are those of smelling and tasting. But graders also use their touch and sight, preparatory to giving butter one of the grades of AA, A, B, C, or CG (cooking grade).

The butter grader is only one of thousands of inspectors, scientists and research workers across the country whose job it is to bring you lower-cost and higher-quality foods, clothing and shelter.

Every year about this time these men survey the progress made during the past year and take a look ahead. Here are some of the things you can expect as a result of their labors:

Dairy Products:

Agricultural scientists are taking a cue from Denmark in the campaign to eradicate undulant fever in human beings and the associated disease of cattle-brucellosis. Now under trial in U.S. agriculture department laboratories is the "ring test," developed by Danish scientists as a method of detecting brucellosis infection in dairy cattle.

The testing material is added to samples of milk taken at creameries. If there is infection in the herd from which the milk comes, a blue ring appears in the test tube at the "cream line."

Dairy scientists have turned still another trick that should please consumers.

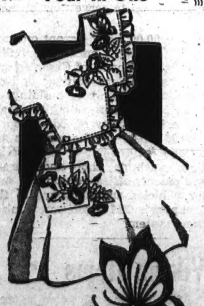

It is the discovery of Dr. George P. Sanders and Dr. Oscar Sager of a sure-fire method for detecting whether the milk and cream in a dairy product—any dairy product—is pasteurized and safe for consumption.

The dairy detectives devised the test through discovery of the fact that there is always present in raw milk a certain enzyme called the "phosphatase." Payoff is the additional fact that the enzyme is always destroyed by heat. Hence its presence in a dairy product reveals that the milk or cream was either under-pasteurized or not pasteurized at all.

Incidentally, if you have in mind buying your own cow, the government's dairy experts have another tip: don't base your purchase on the old notion that the cow is a good milker just because she has a heavy pattern of veins on the surface of udder and abdomen.

Following tests of vein patterns and production records of 200 cattle, the experts have come up with this verdict: there is "little or no relation" between the two factors. Poor

Four-In-One

Lumber:

More and less expensive lumber for home construction should be the eventual result of research by forestry experts. They have discovered that hybrid pine trees may be grown in about half the time it takes to de-

Helpful Hints

To keep the parts of a bathmat from sticking together when you store it, dust it generously with talcum powder and stuff tissue paper in the corners.

Aluminum cooking utensils are quite easy to clean, but are denuded and even pitted by strong alkaline cleaning compounds. To keep utensils in good condition, do not use them for storage foods which discolor or pit the metal.

For washing lingerie, hose and handkerchiefs and other small articles, make a mesh bag with a short zipper opening or omit the zipper and simply tie the top of the bag with two or three turns of cord, then toss the whole thing into the washer. Everything "comes clean" simply and conveniently, too, for there is no searching around in the water for temporarily lost articles.

Smile of the Week—

STUMPED

Fed up with tipping most of the hotel staff for trifling services, the guest determined to call a halt. There came a knock at his door.

"Who is it?" he asked.

"The page, sir, with a telegram."

"Very well," said the determined one. "Just slip it under the door."

After a moment an equally obstinate reply came back. "I can't sir. It's on a tray."

Garden Notes

Sow Grass Early

One garden job that we can carry out in the Spring and that will benefit us regardless of the weather is sowing grass seed. Of course where a new lawn is being established the ground will have to be thoroughly prepared first and this means cultivating, rolling and raking until it is as level as possible and the top soil is worked up fine and all visible weeds destroyed. It is not really safe to sow soil until all the frost is gone and the ground dry enough to walk on without getting one's shoes muddy.

But if it is merely patching a lawn that has to be done, then one can sow anytime, even before the last snow goes. The important thing is to get a good grade of packaged lawn seed, which is a mixture of different grasses, blended so that there will be some quick-growing types to give some shade to the later germinating and more permanent types.

Grass loves cool weather. It must get a good start before the weather really turns warm. For obvious reasons, sow on a windless day and make sure the seed is evenly sown. Experts say it is best to broadcast once lengthwise, then across. If possible water well during dry weather and make sure the mower is razor sharp for the first few cuttings. A dull mower will pull out new grass, make any other plant, grass will benefit from good soil and an occasional dressing of manure or the right kind of chemical fertilizer is rich, where the lawn will not only be a better color and texture but it will be vigorous enough to crowd out most weeds. Where the lawn or part of it is shaded most of the day a special mixture of seed designed for such conditions should be used.

Sweet Peas Early Too

Another early bid is the sweet pea. It gives best results when planted just as soon as one can dig and prepare the necessary little trench. Often one can find a corner of the garden which dries out weeks before the rest. If it is not too shaded and gets some breeze this is just the spot for sweet peas. Dig a trench a foot or so deep. Tramp in about three inches of well-rotted materials, old leaves or manure are best, then top off with a couple of inches of the finest and richest soil available. Plant in this about an inch deep and three inches apart. Let the rains gradually fill in the rest of the trench as the plants come up. This develops the deep, strong root growth that is essential for heavy blooming and health during the Summer weather. Provide support in the form of brush or strings. Wire is not recommended as it injures the tender growth.

Pruning

Pruning can be done anytime from February to June with most shrubs, trees, etc. The general purpose is to remove dead growth, shape the bush or shrub and let in air and sunshine. Shrubs that bloom first in the Spring like the Forsythia, Spirea, etc., should not be pruned until after blooming so that flowering this season will not be spoiled.

TRY AND STOP ME!

By BENNETT CERE

Absent-minded professor story number 63,873; the mad wizard who left his berth for a glass of water and couldn't remember the right number when he returned. He appealed helplessly to the porter, who asked, "haven't you any idea of what part of the car it was in?" The mathematician pondered, and suddenly piped up, "Ah, yes, I remember now that at one time this morning the window looked out on a beautiful little lake."

"Girls," sniffed Farmer Jones disdainfully, as he whittled beside the general store cracker barrel. "Girls are a dime a dozen where I come from." A red headed youngster in the corner looked up and sighed, "Gosh, all hemlock, and here I've been buying only lollypops!"

White pepper is simply well-ripened black pepper.

Affects 2,000 Farmers

Final Arrangements Being Signed For Pipeline Right-Of-Way

REGINA.—More than 2,000 western Canada farm owners—more than half of them in Saskatchewan—have a personal interest in construction of the Edmonton-Regina-Superior oil pipeline. They are the men and women who hold title to land over which that pipe will pass as it snakes across the prairies from the Redwater oil field to Gretna, Man.

Interprovincial Pipeline Co. announced that the process of obtaining the necessary legal authority for construction across these lands is now entering its final phase—a process that has kept the company's land and legal agents busy since early last fall.

More than 2,100 tracts of land will be affected by the pipeline as it crosses Alberta, Saskatchewan and Manitoba before continuing through the United States to Superior, Wis. In each case, owners of the tracts must be contacted personally in order to get written, legal authority before any construction takes place on the land.

In many cases, the owner may not live on his own land. The farm may be run by a tenant while the owner may live in Ontario, California or England. In many cases the land has been found to be tied up in complicated estates, all of which has led to delays and complications.

Company agents first had landowners sign an option for an easement which, in effect, gave the company the right to cross the land. Now the owner is being asked to sign the easement itself which will be registered in the land titles office under caveat.

An easement does not denote ownership of land but merely gives the company the right to enter on the land for purposes of construction, maintenance and repair.

With the signing of the easement the owner receives payment for the

SPORT

Team Captains Select N.H.L. All-Star Team

The current issue of The Hockey News carries the N.H.L. All-Star Team as selected by the six team captains. The six skippers, Sid Abel, Detroit; Ted Kennedy, Toronto; Butch Bouchard, Canadiens; Buddy O'Connor, Rangers; Milt Schmidt, Boston; and Doug Bentley, Chicago, picked two squads and points were awarded on the basis of two for a first place vote and one for a second selection.

The First Team was as follows: Goal—Bill Durnan, Canadiens; Defense—Leo Reise, Detroit and Gus Morrison, Toronto; Center—Sid Abel, Detroit; Right Wing—Maurice Richard, Canadiens and Left Wing—Ted Lindsay, Detroit. Three places on the team fell to players on the Detroit Red Wings. Leo Reise, Sid Abel and Ted Lindsay were unanimous selections. The trio of Red Wings were all practically unanimous selections. Canadiens have two representatives on the mythical club in Bill Durnan and Maurice Richard, while Toronto was able to place a player in Gus Morrison.

The Second Team was composed of the following players: Goal—Charlie DeLoach, Rangers; Defense—Kenney Reardon, Canadiens and Jack Stewart, Detroit or Bill Quackenbush, Boston; Center—Edgar Laprade, Rangers or Paul Ronney, Boston; Right Wing—Gordie Howe, Detroit and Left Wing—Roy Conacher, Chicago or Harry Watson, Toronto.

The Hockey News story divulges many other interesting findings by the six captains including Best Defense—Leo Reise and Jack Stewart; Detroit; Best Line—Ted Lindsay, Sid Abel and Gordie Howe, Detroit; Best Skater—Bill Mosienko, Chicago; Best Stickhandler—Max Bentley, Toronto and Best Referee—George Gravel.

Honest Pup Returns Money To Bank

YORKTON, Sask.—Yorkton has an honest pup. Customers in the Bank of Montreal gaped when Ricky a golden cocker spaniel, trotted up to the tellers cage with a two-dollar roll of dimes. Thinking Ricky may have picked up the money from behind the counters, bank manager Charles McBride made a hurried check of the bank vault and his tellers. All was ship shape.

The mystery was solved minutes later when Bill Kerr, manager of the Yorkton curling rink, phoned to report losing a roll of dimes somewhere between the bank and his office. Ricky is owned by Angus Spice, another Yorkton businessman.

The roll of dimes was stamped "Bank of Montreal" but Ricky cannot read—or can he?

GOOD REVENUE

Each of the 77,450 out-of-state automobiles which visited Oregon this year represented a revenue of \$113.39 for the state.

tal acreage involved in the 60-foot right-of-way across his field. "Payment is calculated at the current per acre market value of the land."

Market value varies considerably along the 790 miles of right-of-way in the prairie provinces. Cultivated land commands a higher price, for instance, than brushland. The land's proximity to settled communities, soil type and other factors influence the value of lands.

Also considered was the fact that as a true wise, the pipe will not be dug up for rerouting. It will remain a fixed underground installation, causing no permanent inconvenience to the farmer.

Whatever the price received, the owner does not sell any portion of his land.

If the pipeline company has an interest in more than three acres in a quarter section by virtue of the easement, the owner still may sell the full 160 acres if he wishes, with the understanding that the company's interest remains subject to the easement.

Inconvenience Temporarily

The farmer on the land may still work the full 160 acres after the line is laid, any inconvenience being of a temporary nature only.

In most cases it will be only a week or two between the time the construction crews dig the trench, lower the wire, line into place and cover it with soil. Debris and cut brush will be removed. The trench will be about 30 inches wide, so normal farm operations can proceed over the right-of-way immediately after the final clean-up.

Damages to crops, fences, timber or livestock will be paid the farmer. In the case of fences the construction contractor will replace those damaged in at least as good condition as when they were cut or otherwise damaged.

Settlement for damages will be made after construction is completed, when the value can be assessed accurately. Damage payments will be in addition to amounts received for signing easements.

Actual construction is scheduled to begin in May. An advance party which will cut fences and install gates will be followed by truck crews stringing pipe along the right-of-way.

These will be followed by the ditching equipment and behind them will come the welding and laying crews. Then will come the machine to tar and wrap the line before it is lowered into the ditch. The ditch will be backfilled with the soil of cultivated land, will be left level.

Officials of the pipeline company report most landowners affected by the construction of the line have readily agreed to permit the line to pass through their fields and have co-operated to the fullest in reaching an amicable settlement with the company.

Winnipeg Man Paint President Of Paint Association

At its annual convention held in Toronto, the Canadian Paint Varnish and Lacquer Association elected a new President to succeed Mr. G. C. McEwen, who had held office since 1948. This 37th President of one of Canada's oldest Trade Associations is Mr. J. Arthur Brodie of Winnipeg.

Mr. Brodie, who took to heart the old adage "Go West, young man," was born and educated in Ontario. His first managerial appointment was as manager of a hardware store in Cochrane, Ontario, and he followed this with a period of selling hardware on the road in Northern Ontario. It was as a traveler in the north country that Mr. Brodie first entered the paint business, selling for the Sanderson Ferry Company of Toronto.

The call to go West came soon after, and Mr. Brodie joined the Marshall Wells Company of Winnipeg as a paint salesman covering the entire Prairie Provinces. Later he held responsible positions with that company in Edmonton, Regina, Winnipeg and Vancouver.

In 1940 Mr. Brodie was recalled to Winnipeg from Vancouver to assume management of International Laboratories Limited, a subsidiary of Marshall Wells Company Limited. He was President of the Paint, Oil and Varnish Club of Winnipeg in 1947 and 1948; chairman of the Community Chest of Greater Winnipeg in 1947 and continues to be active in the Chest work.

Mr. Brodie is also a member of the Executive of the Canadian Manufacturers Association, Executive Committee of the Industrial Development Board of Manitoba, Board of Referees of the Unemployment Insurance Commission, the Manitoba Club and the St. Charles Country Club.

OUR COMPLETE SHORT STORY—

THE CURVE

He Wished His Name
Was Fred Instead Of
Harry.

By HAROLD HELFER

YOU run into a lot of things all right when you're a newspaper reporter but what I remember most is a story I handled in a routine way. Just another traffic death.

It happened some years back. I was along for the ride, in a highway patrol car, looking for feature material.

It had been a rather quiet day, all told, and we were cruising nonchalantly along when a crashing noise broke the stillness.

"Uh, uh," the patrolman said, "Dead Man's Curve." He stepped on the gas.

Dead Man's Curve was a hairpin turn atop Red Mountain that has since been eliminated but it was a hazard in those days. Year in and year out it had taken a steady toll of casualties—and when we arrived there a few minutes later we saw that its grisly list would have to be added to.

A car had failed to negotiate the curve, had smashed through the guard railing and had tumbled some 300 yards or so down the mountain-side.

The officer and I could see the trail of dust that the automobile had wrought in its plunge. Sliding and slipping, we made it as fast as we could.

We found the car on its side and by it a man and woman. The woman, her eyes closed and her dress torn away, lay stretched out and the man was kneeling by her, whispering frantically, "Myra, Myra . . ."

The officer's trained eye sized up the situation. "I'm going for a doctor," he said to me.

"I'll stay behind," I said.

The officer started back. I knelt down alongside the man and said, "Everything is going to be all right. There'll be a doctor here in no time at all."

But I knew that there wasn't much that a doctor would have to do for him—except maybe put a few stitches to a forehead cut—and that there was nothing he'd be able to do for her.

The man looked up at me with bewildered eyes and said, "She won't talk to me, my wife won't talk to me."

I put a hand on his shoulder. "Everything's going to be O.K." As I spoke, the woman's eyes opened slowly. Staring into her husband's face with intense, unfocused eyes, she said: "Oh, Fred, Fred, darling . . ."

He stroked her hair and kissed her on the lips.

"Darling, darling, Fred," she said. "I want you to know that Harry never meant anything to me. It was always you."

"Sure, sure," he said soothingly. Suddenly she winced with pain and he lifted her head in his hands. He lifted her again and said, "Maybe it's best if you don't try to talk."

Her eyes still fixed on his face in the same unblinking way, she said: "I want you to know . . . to be sure . . . that it was never Harry . . . only you, Fred . . . only you . . ."

Her eyes remained opened wide and staring but she was very still now.

The man looked up at me and said, "She's dead, isn't she?"

I nodded.

With one hand under her head and one under her legs, he lifted her up. "What are you going to do?" I asked.

"It's a little muddy here," he said. His eyes had lost their bewilderment. "She's going to have the finest grave that money can buy. And every Sunday I will come by and bring her beautiful bouquets. She was fond of posies . . . There's only two things I wish," he said, speaking almost to himself.

"One," he said, "that it could have been me instead of her . . . And the other, that my name was Fred instead of Harry."

140 Locomotives
Converted To Oil

EDMONTON.

— One hundred and forty Canadian National Railway locomotives have been converted from coal to oil burning equipment in the west since the development of northern Alberta's Redwater oil field. J. P. Johnson of Winnipeg, vice-president in charge of the western region, said in an interview.

There are 180 oil burning locomotives on C.N.R. lines between Biggar, Sask., and the Pacific coast.

PATTERN 4523 SIZES 12-20

Anne Adams

Young And Gay

Most versatile dress you can find! Use it as your prettiest house-and-go-to-market dress, or, depending on your fabric, it can be a handsome spectator sport!

Pattern 4523 comes in sizes 12, 14, 16, 18, 20. Size 16 takes 3 3/4 yards 38-inch fabric.

This pattern, easy to use, simple to sew, is tested for fit. Has complete illustrated instructions.

Send twenty-five cents (25c) in coins (stamps cannot be accepted) for this pattern. Write plainly size, Name, Address and Style Number and send orders to:

Anne Adams Pattern Dept.,
Winnipeg Newspaper Union,
60 Front Street W., Toronto.

Parachute Casualty
Doing Well

EDMONTON.—Pte. J. Risley, 19, of St. James, Man., injured when his parachute failed to open properly at Wainwright Military Camp Jan. 10, is still recuperating in hospital at Wainwright, officials of Western Army Command said. His condition is described as "very satisfactory."

Risley's 1,000-foot fall during a mass parachute jump by Princess Patricia's Canadian Light Infantry was partly broken by his tangled parachute. He suffered a broken back, right leg, right arm and pelvis.

PEGGY

BUT, DEAR PEGGY AND SANDY ARE DOWN IN THE LIVING ROOM... I DON'T THINK YOU SHOULD INTERLUDE!

WHY NOT? THE EVENING PAPER'S DOWN THERE, TOO, AND I'M GOING TO GET IT!

WHOSE LITTLE FINGER IS THIS?

YOURS, DREAMCAKE...

AND WHOSE LITTLE EAR IS THIS?

THAT'S YOURS, TOO...

AND WHOSE LITTLE NOSE IS THIS?

WHEN YOU GET AROUND TO THE EVENING PAPER, IT'S MINE!

Western Briefs

Teachers' Tactics

VANCOUVER.—Vancouver school board does not employ women teachers who are engaged to be married, but it's hard to tell. "Most of the girls take off their engagement rings before being interviewed," says H. N. MacCordale, superintendent of schools.

Purchase Prize Bull
EDEN, Man.—A. D. Kennedy and son Kenneth, have recently returned from Alberta and Saskatchewan where they purchased a bull from the famous herd of J. E. Palmer and Son. The sire of this bull was the grand champion of the Toronto Royal and the purchase price is reported to exceed \$1,500.

Plan Ball Tournament
MARTINFIELD, Sask.—The Martfield Board of Trade will sponsor its second annual baseball tournament on July 13. The one-day tourney will offer \$1,500 in prizes.

22,000 Acres For Sugar Beets
GRETNIA, Man.—A total of 22,000 acres have been contracted for sugar beet growing this year in Manitoba. Largest of the province's eight beet-growing districts is Steinbach, with about 4,300 acres under contract.

Learning To Play Rough
WINNIPEG.—Winnipeg's rookie policemen are learning how to play rough with any criminal who resists arrest. They are studying the not-too-gentle art of self-defence at a headquarters gymnasium, learning judo, jiu-jitsu, boxing and wrestling.

Oil Survey
FOAM LAKE, Sask.—A party of 12 oil men representing the Robert H. Ray Co. have arrived in Foam Lake to survey the area for oil.

Weighty Cake
SASKATCHEWAN.—Saskatchewan committees of the British and Foreign Bible Society shipped a 146-pound cake to London, England, for the 146th anniversary of the parent organization. Each year the headquarters of the world-wide Bible society gets a birthday cake from some overseas country, and each year the cake weighs one-pound more.

SELECTED
RECIPES

CANDIED PUDDING
2 eggs, well-beaten
1 tablespoon flour
1 teaspoon baking powder
1 cup icing sugar
1 cup chopped nuts
1 cup chopped dates

Mix together with eggs, sugar, flour and baking powder. Add chopped nuts and dates. Pour into baking dish and place in pan of warm water. Bake in moderate oven (350 deg. F.) for 45 minutes or until pudding is puffy, browned on top and caramel-like inside.

CHOCOLATE SAUCE
(For Ice Cream)
3 squares chocolate
1/2 cup water
1 cup white sugar
1/2 cup corn syrup
1 cup evaporated milk
1 teaspoon vanilla

Melt chocolate in a double boiler and gradually add water. Stir until smooth. Add sugar and syrup. Cook to soft ball stage. Remove from heat, add evaporated milk and vanilla. Serve hot or cold.

ROAD ROLLERS FOR CANADA
A firm in Lincolnshire, England, has consigned \$215,000 worth of road rollers to reach Canada in time for the opening of the road construction season in April.

Jail Officials Find
Missing Prisoner
Not Missing

REGINA, Sask.

—Provincial jail officials red-facedly unfolded this story: A jail official reported a prisoner missing.

The alarm was sounded. Police were alerted throughout Southern Saskatchewan.

Radio cars and bloodhounds were readied for action. Guards checked the cells to make sure they'd lost only one prisoner.

They found the missing man, getting ready for bed in another cell where he was taken in error after evening roll call.

Three Companies Join
Oil Search In B.C.

VANCOUVER.—Three more oil companies are planning to search for oil and gas in British Columbia. It was learned they are Hudson's Bay Oil and Gas, British-American Oil and Union Oil of California.

The three firms will explore the northeastern section of the province in areas that cover more than 1,000,000 acres.

Fifty Deposits Of
Uranium Located
In Saskatchewan

REGINA.

—Production of uranium may begin in Saskatchewan within two or three years, it is estimated by officials of the Provincial Mineral Resources Branch.

So far some 50 deposits have been located in the province. These officials say that, on the basis of "general engineering estimates", 13 of the finds are outstanding.

Some 35 companies involved in the uranium hunt are expected to spend at least \$1,000,000 this year in exploration and development. That is double the amount spent in 1949.

Prospecting activity in northern Saskatchewan is expected to be at a record level this summer.

The 50 uranium discoveries of the last 15 years indicate the existence of three uranium fields: Beaverlodge-Goldfields, Black Lake and Lac la Ponge. Experts claim some of the finds compare favorably with ore deposits in producing areas in other parts of the world.

ASPIRIN

GENUINE ASPIRIN IS MARKED THIS WAY

Success Tip—
Bake it with MAGIC!

DATE-ORANGE PUDDING

Combine in a greased casserole (8-cup size)
1/2 c. corn syrup, 1 lb. grated lemon rind and 1/2 c. orange juice. Mix and sift once, then sift into a bowl, 1 1/2 c. once-sifted pastry flour (or 1 1/2 c. once-sifted hard-wheat flour), 2 1/2 tsp. Magic Baking Powder, 1/2 tsp. salt and 1/2 c. fine granulated sugar. Mix 1/4 c. corn flakes, slightly crushed, and 1/2 c. cut-up pitted dates. Combine 1 well-beaten egg, 1/2 c. milk, 1/2 tsp. vanilla and 3 lbs. shortening, melted. Make a well in dry ingredients and add liquids; mix lightly. Turn into prepared dish. Bake in moderately hot oven, 375°, about 40 minutes. Serve warm, with pouring cream. Yield—6 servings.

OTTAWA.—Over-all cost of commodities and services used by Canadian farmers showed a slight drop in the five-month period ending in January, while farm living costs increase, the bureau of statistics reported.

Composite price index of commodities and services used by farmers including farm living costs, declined from 102.3 during August last year to 187.9 for January.

PEGGY

BUT, DEAR PEGGY AND SANDY ARE DOWN IN THE LIVING ROOM... I DON'T THINK YOU SHOULD INTERLUDE!

WHY NOT? THE EVENING PAPER'S DOWN THERE, TOO, AND I'M GOING TO GET IT!

WHOSE LITTLE FINGER IS THIS?

YOURS, DREAMCAKE...

AND WHOSE LITTLE EAR IS THIS?

THAT'S YOURS, TOO...

AND WHOSE LITTLE NOSE IS THIS?

WHEN YOU GET AROUND TO THE EVENING PAPER, IT'S MINE!

—By Chuck Thurston

Don't Paint Your Woodwork?

With old-fashioned paint or enamel until you have tried the New KEM-GLO Enamel. This miracle lustrous finish comes in ten rich lustrous colors and white. KEM-GLO is the most economical enamel to use, and this is why—

1. It looks like baked enamel, so smooth, so completely free of brush marks, so deeply lustrous.
2. Requires no undercoaters or primers.
3. Eliminates costly second and third coats with sanding between coats. Yes, one coat does it all.
4. Saves time, dries in three to four hours, room can be painted and reused same day.
5. A finish that meets the specifications of master painters and home owners from Halifax to Victoria.

If after trying this new wonderful KEM-GLO you don't think it is miles ahead of anything you ever used and a way easier to use, bring back the unused portion of the can and we will refund the full purchase price.

And now a word about Machinery—get your orders in immediately for that new MASSEY-HARRIS ONE WAY DISC. The only One Way with the Famous Rotor-Lift. You lift only the disc forward or backward. You wouldn't think of lifting a whole Combine Harvester just to lift the table, the same thing applies to a One Way Disc, that is only one of the exclusive features on the Massey-Harris 509. You get direct draft to the disc axles which means lighter draft, the discs have more dish, cuts easier, and does a better job. No levers to handle, just a quick turn with the finger adjusts the depth quickly. Has the simplest drive to the seed box. These and many other features put the Massey-Harris so far ahead that other makes are obsolete and not in the race any more. Why are M-H. Machines so far ahead of all the rest? Because it is tested and proved under western conditions which are entirely different to eastern and southern conditions. Remember there are over 100 years of experience behind the Massey-Harris line.

Locals

Mr. and Mrs. John Dunbar returned to Irma last week after spending the winter months in Scotland. On the return voyage the sea was very rough and both Mr. and Mrs. Dunbar are glad to see Alberta again. Let's not tell them what it was like here in January.

The WMS is sponsoring an Easter program and short play in the United Church. The tentative date for this is April 3.

Miss Josephine Saville spent last week-end in the city and was a guest at VSA Alumni dance which was held at the Masonic Temple.

Messrs. S. Brown and Rick Larson are ill with flu this week. Let's hope these fine spring days will soon have them both up and about again.

Mr. and Mrs. F. T. Thurston and Ivor were among those attending the Vermilion School of Agriculture Little Royal Fair on March 29.

Mr. and Mrs. Wm. Miles and small sons have left Irma to make their new home in Winnipeg.

Mr. and Mrs. N. Bozak are now in residence here in the house recently vacated by Mr. and Mrs. W. Miles.

We are sorry to report that Mrs. Masson Sr. passed away suddenly on the evening of Wednesday, March 22 at her home here following a heart attack. Full obituary next week.

The sympathy of all go to Mr. and Mrs. Jack Greer on the loss of their infant daughter.

The Irma Branch of the Red Cross are pleased to report that in the recent campaign for funds, Irma has gone over its quota with a grand total of \$310.05. The Society is very proud of such a generous response.

Ladies — Please bring lunch (cake or cookies preferable) for the official opening of the new Irma School on April 3.

NOTICE OF PREPARATION OF ASSESSMENT ROLL, 1950 VILLAGE OF IRMA

Notice is hereby given that the assessment of the previous year has been adopted under the provisions of The Assessment Act, and that the assessment roll of the said municipality has been duly prepared, and that if any person thinks that any property has been wrongfully assessed, or assessed too high, or too low, or that his name or the name of any other person has been wrongfully entered upon or omitted from the roll, he may at any time prior to the 30th day of April, notify the secretary-treasurer in writing of the particulars and grounds of his complaint.

Dated at Irma, this 1st day of April, 1950.

A. C. Charter, Sec.-Treas.

Municipal District of Wainwright No. 61

SALE BY TENDER

Sealed tenders will be received at the office of the Municipal District of Wainwright, No. 61, Wainwright, Alberta, up to 12:00 noon of Saturday, the first day of April, 1950 for the purchase of the NW 4-45-2-4, and the SW 22-45-7-4, sale subject to the approval of the minister of municipal affairs and subject to the reservations contained in the existing certificates of title.

Terms cash.
Highest or any tender not necessarily accepted.

CHAS. WILBRAHAM,
24-31c Secretary-Treasurer.

Municipal District of Wainwright No. 61

NOTICE

The council asks that all residents and the travelling public co-operate with the Municipal District in observing the Road Ban on District Highways and Local Roads that will come into effect very soon, and urges all truckers to govern their hauling commitments accordingly.

With so much snow in the district, road conditions will be very bad during the break-up, and the road ban will be strictly enforced to save the ratepayers the cost of damage done by heavy traffic during the period.

Your consideration in this matter will be appreciated.

CHARLES WILBRAHAM,
Secretary-Treasurer,
M.D. of Wainwright, No. 61,
24th Wainwright, Alta.

Longest river in Canada is the Mackenzie—2,514 miles.
